

# Tecnologías Multimedia - Study Guide - Milestone 1: Basic programming with Python

Vicente González Ruiz - Depto Informática - UAL

September 6, 2020

# 1. Description

The InterCom project [4] is written in Python [3]. You will need to understand the syntax and how to develop/run Python programs (**modules** and **packages**).

## 2. What you have to do?

1. You don't need to master Python to follow this course, but it is convenient for you to follow a tutorial, such as The Python Tutorial [1] if you realize that the language is a setback for you. If you need to start with Python from scratch, a **workshop** [2] like this could be interesting.

### 3. Timming

There is not limit of time for finishing this milestone. Develop it at your own pace.

## 4. Deliverables

None.

## 5. Resources

- [1] The Python Tutorial.
- [2] YAPT.
- [3] Python website.
- [4] The students of Tecnologías Multimedia at the UAL. The InterCom project.
