Tecnologías Multimedia - Study Guide - Milestone 1: Basic programming with Python

Vicente González Ruiz - Depto Informática - UAL

September 6, 2020

1.   Description

The InterCom project [4] is written in Python [3]. You will need to understand the syntax and how to develop/run Python programs (modules and packages).

2. What you have to do?

1. You don't need to master Python to follow this course, but it is convenient for you to follow a tutorial [1] if you realize that the language is a setback for you. If you need to start from scratch with Python, a workshop [2] like this could be interesting.

3. Timming

There is not limit of time for finishing this milestone. Develop it at your own pace.

4. Deliverables

None.

5.   Resources

[1] The Python Tutorial.

[2] YAPT.

[3] Python website.

[4] The students of Tecnologías Multimedia at the UAL. The InterCom project.
